

Seal flipper tags

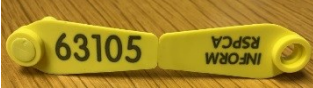

Over 20 centres across Europe rescue seals, many of which deploy flipper tags on release. Although grey seals, in particular can travel >100 km, tags found in the North Sea and west coast of the British Isles were likely tagged in these respective areas. Below is a non-exhaustive list of flipper tags that are/have been used by SMRU, other research institutes and rescue centres across Europe. Many tags include ‘Inform London Zoo’. However, if you can identify the flipper tag deployer, please contact them directly (the relevant rescue centre/research institute) rather than SMRU or London Zoo (which acts as a conduit to SMRU). The exception is for orange 5 digit ‘SMRU’ tags which have also been used by various rescue centres. Please report these via SMRU (using the form) **unless** they start with a 6 (contact RSPCA East Winch), 81 (contact SSPCA), or 80000-80250 (contact RSPCA West Hatch). Please see below for more details. If there are any issues with the information, please email SMRUsealtags@st-andrews.ac.uk

Orange 'SMRU' tags

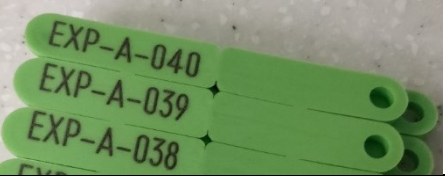

Country	Group/Name	Deployment location	Flipper tag details	Report via
Scotland	SMRU	UK wide	1) Orange ‘SMRU’ tags (5 digits; see above) 2) Blue or yellow U-tags (5 digits)  3) White ‘Duck’ tags (D***) 	Using form @ https://synergy.st-andrews.ac.uk/smru/sealtags/ SMRUsealtags@st-andrews.ac.uk
